

Application No. 10/763,798  
Amendment Dated April 1, 2005  
Reply to Office Action of December 1, 2004

**AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (currently amended) An artificial ornament in the shape of a fungus or plant, having a head member and a stalk member interconnected by flexible connection means which, ~~in-use~~, renders the head member moveable with respect to the stalk member, the stalk member having a connection part which comprises a screw thread at one end thereof which engages said flexible connection means.
2. (original) An ornament according to Claim 1, wherein said flexible connection means is elongate with one end thereof connected to the stalk member and the other end connection to a wall of the head member.
3. (original) An ornament according to Claim 1, wherein said flexible connection means is a spring.
4. (currently amended) An ornament according to Claim [[4]] 3, wherein the spring is stainless steel or other corrosion resistant metal.
5. (currently amended) An ornament according to Claim 1, wherein said flexible connection means comprises a ~~hollow or solid~~ plastics or rubber tube or rod-like member.
6. (canceled)

Application No. 10/763,798  
Amendment Dated April 1, 2005  
Reply to Office Action of December 1, 2004

7. (currently amended) An ornament according to Claim [[6]] 1, wherein the stalk member connection part is tapered and ~~a comprises a screw thread.~~
8. (currently amended) An ornament according to Claim 1, wherein the head member is curved and has an underside with an apex, and wherein ~~or dome-like and the intended~~ underside ~~thereof~~, at or about the apex ~~thereof~~, carries a connection part for attachment thereto of said flexible connection means.
9. (original) An ornament according to Claim 8, wherein the head member connection part is tapered and/or comprises a screw thread.
10. (currently amended) An ornament according to Claim 1, wherein the stalk member has a socket at an ~~intended distal~~ end thereof.
11. (original) An ornament according to Claim 1, wherein one end of the stalk member has an outwardly flared portion to provide a relatively wide base.
12. (currently amended) An ornament according to Claim 10, further comprising a spike having a pair of ends, one end of said spike being which is receivable in said socket and the other end of said spike, which defines a substrate-penetrating point, being arranged to be forced which is forceable into the ground or other substrate on which the ornament is to be located.
13. (original) An ornament according to Claim 1, wherein one or both of the head member and the stalk member are made of pottery, fired to be non-porous.
14. (original) An ornament according to Claim 1, wherein the head member and/or the

stalk member are glazed with weather resistant glaze.

15. (currently amended) A ornament according to Claim 1, wherein said flexible connection means, ~~in use~~, renders the head member capable of restricted vertical movement with respect to the stalk member.
16. (currently amended) An ornament according to Claim 15, wherein said flexible connection means is elongate having a pair of ends with one end thereof connected to the stalk member and the other end connected to the head member.
17. (currently amended) A method of forming [[a]] an artificial plant-shaped or ~~mushroom or toadstool~~ fungus-shaped garden ornament, the method comprising providing a head member and a stalk member having a screw thread at one end thereof and interconnecting the head member and the stalk member using with flexible connection means, said flexible connection means having one end which engages the screw thread such that the head member is moveable with respect to the stalk member.
18. (currently amended) A kit of parts for [[a]] an artificial garden ornament, the kit comprising at least one ~~one or more~~ first part[[s]] in the shape of a first portion of a plant or fungus, ~~one or more~~ at least one second parts in the shape of a second portion of a plant or fungus and one or more flexible connection means, [[a]] the at least one first part and the at least second part being inter-connectable by said flexible connection means, at least one of said first and second parts having a screw thread for engagement with said flexible connection means.

Application No. 10/763,798  
Amendment Dated April 1, 2005
